Board Meeting #71, March 2016:
- Board did not approve the draft standard

New plan:
- **3rd public consultations: end of May 2016**
- Approval by Board in November 2016
- Entering into force in February 2017
Topics for the new public consultation

1. Transaction verification requirements (risk-based approach is considered for the companies/supply chains posing the biggest risk to COC)
2. Cross-site credits method (*one credit account for different sites certified as parts of multi-site with one owner*)
3. Possibility to introduce cross-site “percentage” system

The new standard will also:
1. Incorporate several advice notes and standard interpretations
2. Have more tables and graphics to facilitate the understanding of the requirements

The new draft will not allow:
1. Companies to sell FSC Controlled Wood to non-certificate holders was removed from the standard (will be covered in the CW strategy)
Further information will be provided at the time of consultation

- The 3rd draft is under development by the working group
- It will be presented for your revision in the end of May
- Please join the discussion and provide our opinion about it
